

Los Tiburones

Los tiburones son un tipo de pez que vive en todos los mares del mundo.

Los dientes de un tiburón gigante que vivió hace millones de años.

Los científicos creen que los tiburones vivieron 200 millones de años antes de los dinosaurios. ¡Hace mucho tiempo!

Hay muchos tipos diferentes de tiburones. A ver si puedes distinguir cuál tiburón es el tiburón martillo, cuál es el tiburón tigre, y cuál es el gran tiburón blanco.

Hay muchos tamaños diferentes de tiburones. El tiburón ballena es el pez más grande del mundo. Puede crecer hasta 45 pies de largo.

Otros tiburones pueden ser pequeños, como este pequeño tiburón leopardo. Los tiburones más pequeños sólo miden siete pulgadas de largo.

Algunos tiburones nacen vivos pero otros salen del cascarón, como este.

¿Puedes ver la cabeza, la cola, y las aletas?

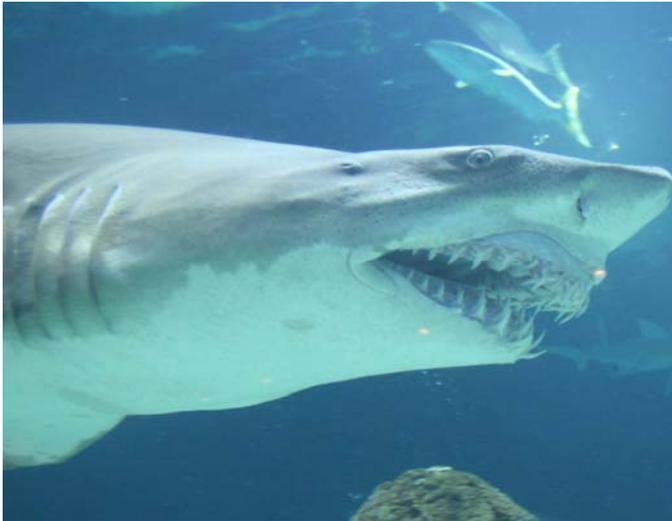

Los tiburones recién nacidos se llaman cachorros. Una madre tiburón no cuida a sus bebés después de que nacen. Se tienen que cuidar solos.

Los tiburones son depredadores mortales, lo cual significa que cazan y comen otros animales como peces, focas, y hasta otros tiburones.

El gran tiburón blanco come quinientas libras de carne cada día.

Los tiburones atrapan su presa con sus dientes afilados. Cuando se caen los dientes del tiburón, nuevos dientes crecen. Tienen al menos cuatro capas de dientes filosos.

Los tiburones tienen un buen sentido del olfato y pueden seguir el olor de sangre desde una milla de distancia.

Los tiburones pueden ver más o menos tan bien como la gente. Oyen sonidos debajo del agua desde millas de distancia.

Los únicos animales que cazan a los tiburones son otros tiburones y la gente. La gente atrapa tiburones para comérselos, como los filetes de tiburón en esta foto.

El mejor lugar para ver un tiburón es en el acuario. Si tienes suerte, ¡podrías alcanzar a acariciarlo!

The Mustard Seed Books project uses an open-source, Wikipedia-type strategy, leveraging public expertise to create and refine a set of high-quality books that support early reading development. All of the books and pictures are covered by the Creative Commons License (<http://creativecommons.org/licenses/by-nc-sa/3.0/>) and are free to print, distribute, and modify for personal or educational use. The books are available at www.mustardseedbooks.org. New titles appear on a regular basis.

There is a blog post on the website so that we can receive and discuss feedback on the books. These books have been revised a number of times, but we'd love to keep improving them. Any feedback is welcome. We also welcome photos or ideas for new books.

Photos for these books come primarily from Flickr (www.flickr.com) and the Morgue File (www.morguefile.com). Both sites are great resources for high-quality publicly accessible photos and for aspiring photographers looking to share their work. All photographs are covered by the Creative Commons License (<http://creativecommons.org/licenses/by-nc-sa/3.0/>).

Reading Recovery: 13

Our aim with this series of books is to weave together two significant goals in the design of early reading materials—that the books are both instructional and engaging. Books designed to develop reading skills often end up feeling like work to read, while books designed to be interesting are often too difficult for beginning readers.

These books for beginning readers support phonics-based classroom instruction by including a high concentration of phonetically regular words, as well as the most commonly used sight words. However, the books are written using pictures and stories that make sense, with simple language structures supporting independent reading and language development. Our intent is to produce books that kids want to read, think about, talk about and read again.
